

LEARNING OBJECTIVES

6-5-18

DESIRED OUTCOMES

At the end of the presentation, attendees will be able to:

- conduct a thorough history and examination of the patient with an ankle injury, order appropriate imaging, and make the differential diagnosis.
- appropriately treat ankle fractures and/or know when to make an emergent (ie, immediate) surgical referral
- prepare to assess cultural diversity issues in risk, incidence, prevalence, disease burden, or mortality associated with ankle injuries and/or cultural disparities in access, diagnosis at more advanced stages, or less adherence to treatment regimens.
