

LEARNING OBJECTIVES

10-11-22

PERFORMANCE GAP/ ACTIVITY NEED:

Medical training has undergone enormous changes in the last few years, beginning with work hour restrictions. These changes have occurred while the overall required skill and competence for a medical doctor have not changed or have only increased. In this lecture we will discuss different aspects of skill acquisition and how they apply to medical training as inspired by insights from the professional sport of tennis.

DESIRED OUTCOMES: At the end of the activity, attendees will be able to:

- describe the current limitations of medical training.
- discuss aspects of skill acquisition.
- Discuss modern aspects of medical training.

LEARNERS: All medical staff including PA and NP as well as all ancillary clinical staff.

CULTURAL/LINGUISTIC DIVERSITY/IMPLICIT BIAS (AB241) Reflect on how implicit bias may impact the training of medical students, particularly as related to gender, race, or ethnic background.

DESIRABLE PHYSICIAN ATTRIBUTE: provide patient care, incorporate medical knowledge.
